

KLINGER TOPLINE K55

Graphite Encapsulated PTFE
Yarn Packing

New generation, multiservice packing for both valves & pumping applications.

Manufactured from PTFE filaments, which have been specially treated to incorporate a high quality graphite based lubricant allowing use in dynamic applications operating at high peripheral speeds with extremely low leakage rates.

Klinger TopLine packing range has been selected to provide users with gland sealing products that meet today's demanding services, offering effective and trouble-free sealing during application. To achieve this goal we have selected the best materials and the best production methods.

GENERAL PROPERTIES

- » Virtually resistant to all media including strong acids and alkalis.
- » Klingerlock braided offering excellent sealing & reliability in high performance duties.
- » Good heat transfer properties improving performance in dynamic applications.
- » Due to its wide service capabilities K55 TopLine packing offers the user a universal packing material with excellent sealing life. This reduces the number of different packing grades that must be held as stock.
- » K55 is clean to handle and requires only minimal gland loading to affect a satisfactory seal.

TESTS AND CERTIFICATIONS

- » WRAS Approval for use with potable water
