STOP GLOBE VALVE TYPE 648

CHARACTERISTIC:

Diameter	-	15 -100 mm;
Pressure	-	250 bar;
Temperature	-	up to 670°C;
Medium	-	water, steam and other non-toxic, non aggressive liquid and gas media.

VERSIONS:

type / ends / body material / disc and disc ring / drive type Example:

648 / ---- / ---- / ---- / ----648 / K / U / L / ---Example:

		13CrMo4-5	Α					NWA drive	NW
Flange by DIN or ANSI, or Threaded	κ	11CrMo9-10	В					MODACT drive	NM
Illeaded		14MoV6-3	С					NODACT UNVE	
		X10CrMoVNb9-1	Е					Hand wheel	NP

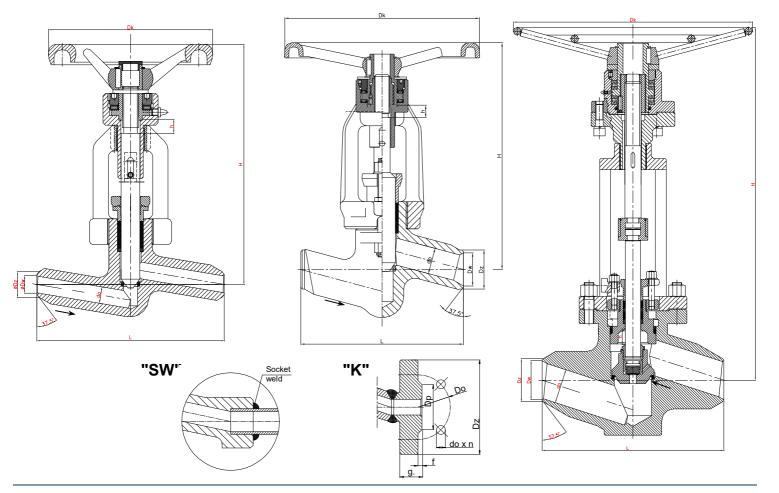

APPLICATION:

Stop globe valve (648) is designed to open and stop the flow. The valve is not supposed to be used as a regulating device. For regulation the version (673) with throttling plug should be applied.

MOUNTING AND OPERATING:

The valve can only be mounted and operated by skilled, properly trained and qualified personnel. Incorrect assembly or operation of the valve may have substantial impact on the entire system such as fluid leakage, reduction in system's function etc.

Before a valve is installed the pipeline must be clean from any mechanical impurities. The compatibility of critical parameters of the flow must be checked with the parameters of the valve. Stop globe valve can be mounted to a pipe-line in any position. The direction of flow should only comply with the arrow marked on the body. The valve should be operated strictly with its assign. In order to provide valve's reliability the following suggestions must be observed:

- medium flowing through the valve is supposed to be clean out of any mechanical impurities;
- the valve must be protected from any mechanical damages during its work;
- nominal parameters marked on the valve must be observed.
