

Technical data Actuator controls

General information

AC 01.2 actuator controls for controlling multi-turn actuators of the SA/SAR .1, SA/SAR .2 type range and part-turn actuators of the SQ/SQR type range with Profibus DP interface.

Features and functions																				
Power supply	Standard voltages AC:																			
	3-phase AC Voltages/frequencies

Features and functions					
Switchgear	Standard:	Reversing contactors (mechanically and electrically interlocked) for AUMA power classes A1/A2			
	Options:	Reversing contactors (mechanically and electrically interlocked) for AUMA power class A3			
		Thyristor unit for mains voltage up to 500 V AC (recommended for modulating actuators) for AUMA power classes B1, B2 and B3 $$			
	The reversing contactors are designed for a lifetime of 2 million starts. For applications requiring a high number of starts, we recommend the use of thyristor units. For the assignment of AUMA power classes, please refer to Electrical data on actuator				
Control and feedback signals	Via Profibus I	DP interface			
Fieldbus interface with additional input signals (option)	 2 free analogue inputs (0/4 – 20 mA), 4 free digital inputs Signal transmission is made via fieldbus interface Inputs OPEN, STOP, CLOSE, EMERGENCY, I/O interface, MODE (via opto-isolator thereof OPEN, STOP, CLOSE, MODE with one common and EMERGENCY, I/O interface respectively without common) OPEN, STOP, CLOSE, EMERGENCY control inputs I/O interface: Selection of control type (fieldbus interface or additional input signals) 				
	mA p	E: Selection between open-close duty (OPEN, STOP, CLOSE) or modulating duty (0/4 – 20 position setpoint) ionally 1 analogue input (0/4 – 20 mA) for position setpoint			
	 Inputs OPEN, STOP, CLOSE, EMERGENCY, I/O interface, MODE (via opto-isolator thereof OPEN STOP, CLOSE, MODE with one common and EMERGENCY, I/O interface respectively without common Pennetron open, STOP, CLOSE, EMERGENCY control inputs I/O interface: Selection of control type (fieldbus interface or additional input signals) MODE: Selection between open-close duty (OPEN, STOP, CLOSE) or modulating duty (0/4 – mA position setpoint) Additionally 1 analogue input (0/4 – 20 mA) for setpoint position and 1 analogue input (0/4 – 20 for actual process value 				
Control voltage and current consump-	Standard	24 V DC, current consumption: approx. 10 mA per input			
tion of optional, digital additional in- puts	Options:	48 V DC, current consumption: approx. 7 mA per input 60 V DC, current consumption: approx. 9 mA per input 115 V DC, current consumption: approx. 15 mA per input 100 – 120 V AC, current consumption: approx. 15 mA per input			
	All input signa	als must be supplied with the same potential.			
Status signals	Via Profibus I	DP interface			
Fieldbus interface with additional output signals (option)	 6 program 5 pot Defaut 1 pot Defaut 6 program 5 pot 1 pot 6 program 6 program 6 program 6 program 4 ma 	nary output signals (only available in combination with additional input signals (option) mmable output contacts: ential-free NO contacts with one common, max. 250 V AC, 1 A (resistive load) ult configuration: End position CLOSED, end position OPEN, selector switch REMOTE, torque CLOSE, torque fault OPEN ential-free change-over contact, max. 250 V AC, 5 A (resistive load) ult configuration: Collective fault signal (torque fault, phase failure, motor protection tripped) mmable output contacts: ential-free change-over contacts with one common, max. 250 V AC, 1 A (resistive load) ential-free change-over contact, max. 250 V AC, 5 A (resistive load) mmable output contacts: ential-free change-over contacts without one common, max. 250 V AC, 5 A (resistive load) mmable output contacts: ins failure proof potential-free NO contacts with one common, max. 250 V AC, 1 A (resistive			
	 load), 1 potential-free NO contact, max. 250 V AC, 1 A (resistive load), 1 potential-free change-over contact, max. 250 V AC, 5 A (resistive load) 6 programmable output contacts: 4 mains failure proof potential-free NO contacts, max. 250 V AC, 5 A (resistive load), 2 potential-free change-over contacts, max. 250 V AC, 5 A (resistive load), All binary output signals must be supplied with the same potential. Analogue output signal for position feedback 				
	- Gaiva	anically isolated position feedback 0/4 – 20 mA (load max. 500 Ω)			

Features and functions					
Voltage output	Standard:	Auxiliary voltage 24 V DC: max. 100 mA for supply of control inputs, galvanically isolated from internal voltage supply.			
	Option:	Auxiliary voltage 115 V AC: max. 30 mA for supply of control inputs, galvanically isolated from internal voltage supply (Not possible in combination with PTC tripping device)			
Profibus DP-V1 (option)	Access to parameters, the electronic name plate and the operating and diagnostic data with acyclic write/reaservices				
	RedCom) Synchronisati	behaviour according to Profibus DP-V2 specification no. 2.212 (Primary and Backup with ion of time between actuator controls and Profibus master with subsequent time stamp of the nt events such as malfunctions, end position and torque signals from actuator controls			
Redundancy (option)	Requires Profibus DP-V2 (option) Redundant line topology with universal redundancy behaviour according to AUMA redundancy I or II Redundant line topology and redundancy behaviour according to Profibus DP-V2 specification no. 2.212 (Primary and Backup with RedCom)				
FO cable connection (option)	 FO cables Multi- Single Topologie Baud rate Optical buth Multi- Single Wave length 	emode: 62,5(50)/125 μm, range approx. 2.5 km (max. 2.0 dB/km) e-mode: 9/125 μm, range approx. 15 km (max. 0.4 dB/km) es: Line, star and redundant loop (with single-channel Profibus DP interface) e: up to 1.5 Mbit/s			
Local controls	Standard: Option:	 Selector switch: LOCAL - OFF - REMOTE (lockable in all three positions) Push buttons OPEN, STOP, CLOSE, RESET Local STOP The actuator can be stopped via push button STOP of local controls if the selector switch is in position REMOTE. (Not activated when leaving the factory.) 6 indication lights: End position and running indication CLOSED (yellow), torque fault CLOSE (red), motor protection tripped (red), torque fault OPEN (red), end position and running indication OPEN (green), Bluetooth (blue) Graphic LC display: illuminated Special colours for the indication lights: 			
	-	 End position CLOSED (green), torque fault CLOSE (blue), torque fault OPEN (yellow), motor protection tripped (violet), end position OPEN (red) 			
Bluetooth Communication interface	Bluetooth class II chip, version 2.1: With a range up to 10 m in industrial environments, supports the SPP Bluetooth profile (Serial Port Profile). Required accessories: AUMA CDT (Commissioning and Diagnostic Tool for Windows-based PC) AUMA Assistant App (Commissioning and Diagnostic Tool for Android devices)				

Features and functions					
Application functions	Standard:	 Selectable type of seating, limit or torque seating for end position OPEN and end position CLOSED Torque by-pass: Adjustable duration (with adjustable peak torque during start-up time) Start and end of stepping mode as well as ON and OFF times can be set individually for directions OPEN and CLOSE, 1 to 1,800 seconds Any 8 intermediate positions: can be set between 0 and 100 %, reaction and signal behaviour programmable Running indication blinking: can be set Positioner Position setpoint via Profibus DP interface Automatic adaptation of dead band (adaptive behaviour selectable) Change-over between OPEN-CLOSE control and setpoint control possible viafieldbus interface Profibus DP interface 			
	Options:	 PID process controller: with adaptive positioner, via 0/4 – 20 mA analogue inputs for process setpoint and actual process value Multiport valve: Up to 16 positions, signals (pulse or edge) Automatic deblocking: Up to 5 operation trials, travel time in opposite direction can be set Static and dynamic torque recording for both rotation directions with torque measurement flange as additional accessory 			
Safety functions	Standard:	 EMERGENCY operation (programmable behaviour) Via additional input (option, low aktive) or via fieldbus interface Reaction can be selected: Stop, run to end position CLOSED, run to end position OPEN, run to intermediate position Torque monitoring can be by-passed during EMERGENCY operation Thermal protection can be by-passed during EMERGENCY operation (only in combination with thermoswitch within actuator, not with PTC thermistor). 			
	Options:	 Release of local controls via fieldbus interface. Thus, actuator operation can be enabled or disabled via push buttons on local controls. Local STOP The actuator can be stopped via push button Stop of local controls if the selector switch is in position REMOTE. (Not activated when leaving the factory.) Interlock for main/by-pass valve: Enabling the operation commands OPEN or CLOSE via fieldbus interface EMERGENCY Stop push button (latching): interrupts electrical operation, irrespective of the selector switch position. PVST (Partial Valve Stroke Test): programmable to check the function of both actuator and actuator controls: Direction, stroke, operation time, reversing time 			
Monitoring functions	Motor temMonitoringMonitoringOperationPhase fail	rload protection: adjustable, results in switching off and generates fault signal perature monitoring (thermal monitoring): results in switching off and generates fault indication g the heater within actuator: generates warning signal g of permissible on-time and number of starts: adjustable, generates warning signal time monitoring: adjustable, generates warning signal ure monitoring: results in switching off and generates fault signal correction of rotation direction upon wrong phase sequence (3-ph AC current)			
Diagnostic functions	 Electronic device ID with order and product data Logging of operating data: A resettable counter and a lifetime counter each for: Motor running time, number of starts, torque switch trippings in end position CLOSED, limit switch trippings in end position OPEN, torque faults CLOSE, torque faults OPEN, motor protection trippings in end position OPEN, torque faults CLOSE, torque faults OPEN, motor protection trippings Time-stamped event report with history for setting, operation and faults Status signals according to NAMUR recommendation NE 107: "Failure", "Function check", "Out of specification", "Maintenance required" Torque characteristics (for version with MWG in actuator): 3 torque characteristics (torque-travel characteristic) for opening and closing directions can be saved separately. Torque characteristics stored can be shown on the display. 				
Motor protection evaluation	Standard: Options:	Standard: Monitoring the motor temperature in combination with thermoswitches within actuator mo			

Features and functions						
Overvoltage protection (option)	Protection of	Protection of the actuator and control electronics against overvoltages on the fieldbus cables of up to 4 kV				
Electrical connection	Standard:	AUMA plug/socket connector with screw-type connection				
	Option:	Gold-plated control plug (sockets and plugs)				
Threads for cable entries	Standard:	Metric threads				
	Options:	Pg-threads, NPT-threads, G-threads				
Wiring diagram (basic version)	TPCAA000-1A1-A000 TPA00R1AA-0A1-000					

Further options for Non-intrusive version with MWG in the actuator						
Setting of limit and torque switching via local controls						
Torque feedback signal	Via Profibus DP interface Galvanically isolated analogue output $0/4-20$ mA (load max. $500~\Omega$). Option, only possible in combination with output contacts.					
Wiring diagram (basic version)	TPCAA000-1A1-A000 TPA00R100-0I1-000					

Settings/programming the Profibus DP interface				
Baud rate setting	Automatic baud rate recognition			
Setting the fieldbus address	The Profibus DP address is set via the actuator controls display.			
Configurable process representation via GSD file	For optimum adaptation to the process control system, the process representation input (feedback) can be freely configured.			

General Profibus DP interface data	1						
Communication protocol	Profibus DP according to IEC 61158 and IEC 61784						
Network topology	Line (fieldbus) structure. When using repeaters, tree structures can also be implemented. Coupling and uncoupling of devices during operation without affecting other devices is possible.						
Transmission medium	Twisted, screened copper cable	e according to IEC 61158					
Profibus DP interface	EIA-485 (RS-485)						
Transmission rate/cable length	Baud rate (kbit/s)	Max. cable length (segment length) without repeater	Possible cable length with repeater (total network cable length):				
	9.6 – 93.75	1,200 m	approx. 10 km				
	187.5	1,000 m	approx. 10 km				
	500	400 m	approx. 4 km				
	1,500	200 m	approx. 2 km				
Device types	DP master class 1, e.g. central controllers such as PLC, PC, DP master class 2, e.g. programming/configuration tools DP slave, e.g. devices with digital and/or analogue inputs/outputs such as actuators, sensors						
Number of devices	32 devices without repeater, with repeater expandable to 126						
Fieldbus access	Token-passing between masters and polling for slaves. Mono-master or multi-master systems are possible.						
Supported Profibus DP functions	Cyclic data exchange, sync mode, freeze mode, fail safe mode						
Profibus DP ident no.	0x0C4F: Standard application	ations with Profibus DP-V0 and DP	-V1				
	0x0CBD: Applications with Profibus DP-V2						

Commands and signals of the Profibus DP interface					
Process representation output (command signals)	${\tt OPEN, STOP, CLOSE, position setpoint, RESET, EMERGENCY operation command, enable local controls, } \\ {\tt Interlock OPEN/CLOSE}$				
Process representation input (feed-back signals)	 End positions OPEN, CLOSED Actual position value Actual torque value, requires MWG in actuator Selector switch in position LOCAL/REMOTE Running indication (directional) Torque switches OPEN, CLOSED Limit switches OPEN, CLOSED Manual operation by handwheel or via local controls Analogue (2) and digital (4) customer inputs 				
Process representation input (fault signals)	 Motor protection tripped Torque switch tripped in mid-travel Failure of analogue customer inputs One phase missing 				
Behaviour on loss of communication	The behaviour of the actuator is programmable: Stop in current position Travel to end position OPEN or CLOSED Travel to any intermediate position Execute last received operation command				

Service conditions						
Use	Indoor and ou	Indoor and outdoor use permissible				
Mounting position	Any position	Any position				
Installation altitude	≤ 2,000 m abo > 2,000 m abo	ove sea level ove sea level, on request				
Ambient temperature	Standard:	−30 °C to +70 °C				
	Options:	-60 °C to +60 °C, extreme low temperature version				
		Low temperature versions incl. heating system for connection to external power supply 230 V AC or 115 V AC, or internal version 400 V AC.				
Humidity	Up to 100 % i	relative humidity across the entire permissible temperature range				
Enclosure protection according to EN	Standard:	IP68				
60529	Option:	Terminal compartment additionally sealed against interior of actuator controls (double sealed)				
	 According to AUMA definition, enclosure protection IP68 meets the following requirements: Depth of water: Maximum 8 m head of water Duration of continuous immersion in water: Maximum 96 hours Up to 10 operations during continuous immersion Modulating duty is not possible during continuous immersion. 					
Pollution degree according to IEC 60664-1	Pollution degr	ree 4 (when closed), pollution degree 2 (internal)				
Vibration resistance according to IEC 60068-2-6	1 g, from 10 Hz to 200 Hz Resistant to vibration during start-up or for failures of the plant. However, a fatigue strength may not be derived from this. (Not valid in combination with gearboxes)					
Corrosion protection	Standard:	KS: Suitable for use in areas with high salinity, almost permanent condensation, and high pollution.				
	Option:	KX: Suitable for use in areas with extremely high salinity, permanent condensation, and high pollution.				
Coating	Double layer powder coating Two-component iron-mica combination					
Colour	Standard:	AUMA silver-grey (similar to RAL 7037)				
	Option:	Available colours on request				

A	
Accessories	
Wall bracket	For actuator controls mounted separately from the actuator, including plug/socket connector. Connecting cable on request. Recommended for high ambient temperatures, difficult access, or heavy vibration during service. Cable length between actuator and actuator controls is max. 100 m (Not suitable for version with potentiometer in the actuator). Instead of the potentiometer, the actuator has to be equipped with an electronic position transmitter. (MWG requires a separate data cable.)
Programming software	AUMA CDT (Commissioning and Diagnostic Tool for Windows-based PC) AUMA Assistant App (Commissioning and Diagnostic Tool for Android devices)
Torque measurement flange DMF	Accessory for torque measurement for SA/SAR 07.2 – SA/SAR 16.2

Further information					
Weight	Approx. 7 kg (with AUMA plug/socket connector)
