

OM 1-phase
50Hz

Submersible sump pumps

With a light fibre-reinforced plastic casing and head cover, the pump is abrasion and corrosion resistant, minimizing maintenance.

Vortex Impeller

This impeller is used mainly to avoid clogging or wear by large or stringy solids in the water. It accelerates part of the water to great speed, and this speed is used to smoothly move all the water from inlet to outlet.

Free impeller passage 10mm - the vortex impeller eliminates blocking and binding.

A | Double mechanical shaft-seal in oil chamber

Ensures maximum protection and long motor life.

B | A thermostat protects the powerful 0,15kW motor from overheating

C | Integral float-type (model OMA)

Controls water level precisely and automatically, switching the pump on and off as level rises and falls.

D | Casing and head cover made of fibre-reinforced plastic

The pump is abrasion and corrosion resistant, minimizing maintenance.

E | Vortex impeller

Eliminates blocking and binding. Made of FRP, it withstands long operation, with minimal abrasive wear.

Specifications:

Model	Colour code curve	Bore mm	Power output kW	Phases	r.p.m.	Head max. m	Capacity max. l/min	Starting method	Dry weight kg without cable	Impeller passage mm	Cable m
OM		32	0,15	1	2850	7,5	195	condensor	5,9	10	10
OMA		32	0,15	1	2850	7,5	195	condensor	5,9	10	10

ø Discharge bore mm			32mm
Pumping Fluid	Type of Fluid		Domestic sewage
	Temperature		0-40°C
Pump	Components	Impeller	Vortex impeller
		Shaft Seal	Double mechanical seal
		Bearings	Shielded ball bearings
	Material	Impeller	Glass fibre reinforced plastic
		Upper casing	Glass fibre reinforced plastic
		Lower casing	Glass fibre reinforced plastic
		Shaft Seal	Silicon carbide in oil bath
Motor	Type, Poles		Induction motor, 2 poles, IP68
	Phase / Voltage		Single phase 230V / 110V / 50Hz
	Insulation		Insulation class E
	Lubrication		Turbine oil (ISO VG32)
	Motor Protector (built-in)		Circle thermal cut-out
	Material	Casing	Stainless steel EN-X5CrNi18-10
		Shaft	Stainless steel EN-X6Cr13
Cable		Rubber, 10m H07RN-F, H07RN-F	
Discharge Connection			Inside thread, flange

Contributing to World-wide Prosperity and
Understanding through Worker- and
Environment-friendly Production.

Designed for increased productivity through fully integrated streamlined production systems, Tsurumi's factory in Kyoto (Japan) features a production capacity of a full 1 million pumps per year. Large-scale modern R&D facilities offer optimum conditions for experimenting and testing of even super-large pumps and for developing new products to expand the possibilities and applications of pumps. To provide optimum conditions for our main asset, our workers, as well as for the environment, special emphasis is placed on optimized working conditions with airconditioning, minimized dust and exhaust gas emission, comprehensive recycling and waste recovery.

We reserve the right to change specifications and designs herein for improvement without prior notice. Our pumps are for professional use only. In the event that Tsurumi (Europe) GmbH have, in exceptional cases taken over, a manufacturer's warranty, this entitles the enduser to assert remedy free of charge against Tsurumi (Europe) GmbH due to any defect to the product occurring during the guarantee period (see below), also then when the warranty claims against the seller do not or no longer exist. In the event of malfunction, which is attributable to the improper handling by the enduser, no guarantee claim shall arise. Further claims shall not result from the warranty, unless if something to the contrary has explicitly been determined. The decision as to whether remedy is effected by way of replacement or repair shall be at the choice of Tsurumi (Europe) GmbH. The claims shall be time barred after a period of three months after expiry of the guarantee period, however, not before expiry of the warranty period which is valid towards the seller. In the event of doubt, the warranty period shall correspond with the warranty period which is valid between the end-user and his seller.
